

### The Complete Approach to LLQP Success

SeeWhy Learning's Complete Approach is designed for learners who want to build deep, lasting knowledge, chapter by chapter, and then apply it through practice.

### Before You Begin

 <b>Getting Started</b>  <b>Day 1:</b> Complete the <b>Ethics for Life Insurance Agents &amp; Mutual Fund Dealing Representatives</b> course in your SeeWhy Learning account first, to activate your LLQP tools.	 <b>What You'll Use</b>  VL = Video Lessons and Practice Question Take-up (PQTU) Videos SG = Study Guides FC = Flash Cards QZ = Chapter Quizzes and Mini-Tests PCE = Practice Certification Exams PPE = Practice Provincial Exams (final phase only)   <b>Optional Study Tools</b>  GS = Game Shows MG = Matching Games
---	---

Repeat this process for every module:

**Step 1: Watch the key concept video lessons before beginning each module.**

The video series covers key concepts from all four modules in short, focused videos organized by topic. Watch only the lessons for the module you are about to begin; you will return to the series at the start of each new module. After watching, you won't know everything, but you'll have a solid foundation to move into the next phase of your studies.

**Note:** You will re-watch the entire Video Lesson series when you begin Final Review for your Provincial Exams.

**Step 2: Read the study guide for the chapter.**

The SeeWhy Learning Study Guide is designed to continue building the fundamental knowledge of the course material by condensing and simplifying the course content using everyday language, memory aids, analogies and exam tips. Consider the study guide a plain-language summary of the CISRO manual. Read the study guide for each chapter before moving on to the flash cards and quiz questions.

### Step 3: Complete the Flash Cards.

The flash cards are designed to continue teaching you many of the key concepts that you'll find on the exam really quickly. You can cover a lot of ground in a very short period of time with the flash cards. It's almost like you have a personal tutor by your side asking you questions and then giving you detailed answers. When you're presented with a flash card, read it and answer in your head or write the answer down. Then click on SeeWhy Learning's famous big red answer button. Did you get it right? If so, pat yourself on the back. If not, that's okay. It's a learning opportunity. But either way, study the answer key very carefully. There's a lot of good learning there.

### Step 4: It's time to start building on your knowledge through practice questions.

This is where the rubber really hits the road. Each quiz is a learning tool in and of itself, so don't wait until you feel you know the content cold before tackling them.

Remember, every wrong answer is a learning opportunity. That's exactly why you're practising!

- If you get a question right, read the rationale (answer key explanations) to confirm you selected it for the right reasons, and soak up the Trainer Tips.
- If you get a question wrong, read the rationale to see if you have that “light bulb” moment.
- If the rationale still doesn't click, refer back to the SeeWhy Learning Study Guide to clarify the concept.

### Step 5: Work through SeeWhy's Practice Certification Exams repeatedly until you're scoring consistently well.

The Practice Certification Exams (PCE) are representative of the real certification exams in terms of style and conceptual focus. Doing the PCEs repeatedly until you are scoring very well will put you in an excellent position to succeed on exam day!
